

The Lansing Difference

For more than 50 years, Lansing Building Products has set the standard for exceptional customer service and the finest exterior building materials in the industry. Our windows and sliding doors are recognized for their high-quality craftsmanship, innovative engineering and close attention to detail. You can feel comfortable knowing that when you choose Lansing, you're choosing a long-lasting, energy-efficient product that never compromises on style, performance or value. That's the Lansing difference.

Our High-Performance Vinyl

When it comes to low-maintenance, affordable windows, you can't beat vinyl. Lansing vinyl windows and doors never rust, rot or corrode. They never need painting, and they're easy to clean and maintain. You can also forget about scraping away paint that has chipped or peeled, or spending hours repairing rotted wood. With vinyl products from Lansing Windows and Doors, you enjoy beautiful windows that are practically maintenance-free and customizable to almost any style.

Vary Your Options, Vary Your Style

Lansing also provides a complete array of replacement windows in casement, awning, slider, bay and bow, and garden styles, as well as specialty shapes to give you the precise look you want. We also offer sliding patio doors in 5', 6', 6'4", 8', 9', and 12' models.

Where Affordability Meets Style

Lansing Windows and Doors is proud to offer a fresh perspective on vinyl in our Series 40 vinyl replacement windows. These versatile and stylish windows are the perfect complement to any home, with minimal maintenance and upkeep. Add our superior energy-efficiency features and you're guaranteed to save money while you enhance your home's visual appeal.

Standard Series 40 Features

- Reinforced, multi-cavity construction provides additional thermal performance and structural integrity.
- Fusion-welded sashes and frame add strength and boost thermal performance.
- Insulated glass panels with optimum thermal air space featuring warm-edge spacer system.
- Constant force coil balance permits easy sash movement.
- Sloped sill reduces air infiltration and allows for easy water runoff.
- Half-screen comes standard.*
- Positive-action cam lock enhances safety (2 locks standard at 27¼" or wider).
- Dual night latches provide optimum ventilation.
- Integrated lift rail allows you to raise and lower windows with ease.
- Interlocking sashes keep out drafts.
- Dual-fin weather stripping further reduces air infiltration.
- Rubber bulb seal helps block outside air.
- Jamb depth is 3.25".

Optional Features

- Factory mulling
- Full screen*
- " or ½" flat or diamond grid
- ¾" or 1" contoured grid
- ¾" or 1" contoured grid
- Double-strength glass
- Low-E glass
- Low-E glass with insulating argon gas
- Ultra Low-E glass with argon gas
- Lifetime glass breakage warranty
- Color options: White, Almond

2-Lite Slider

Go Green, Save Green

Eco-sustainability is something we take very seriously at Lansing. Our environmentally friendly products are built with the earth's limited resources in mind while offering you the energy efficiency and cost savings you're looking for in your replacement windows. First, we start with premium vinyl. Then we engineer a window with fusion-welded frames and sashes, security latches and locks, and optimal thermal performance. And because our vinyl is blended and extruded in-house, we oversee complete quality control and are able to pass on significant cost savings to you.

2-Lite Casement

Leave the Weather Outside

All of our windows and doors are designed to yield outstanding thermal performance. Because windows are mostly glass, it's important that they be made with the highest-quality glass available. That's exactly what you'll get with windows from Lansing—because every Lansing window comes with our warm-edge sealant system and multiple high-performing glass options.

Series 40 Warranty

Every Lansing window is backed by a limited lifetime warranty on vinyl, glass and all working parts. Each product is individually registered with a product identification number, making ordering replacement parts throughout the warranty period easy and efficient. For additional peace of mind, you may purchase a lifetime glass breakage warranty.

See warranty for complete coverage details.

Proud Supporter of Energy Star®

By helping to maintain your home's indoor temperature, your windows help reduce power consumption and contribute to our country's conservation efforts. To help you select the optimum window or door for your home, the Department of Energy outlines specific thermal properties a window or door must have to achieve the Energy Star rating. Lansing Windows and Doors enthusiastically supports the Energy Star program and is committed to helping you select the appropriate glass option for your needs.

Multiple Glass Options for Series 40 Replacement Windows

With multiple glass options to increase energy efficiency, there is a glass package to fit any climate need and budget.

Low-E Glass – With Low-E glass, two layers of silver coating reflect heat back to its source. So in the summer, the heat stays outside, while in the cold winter months, your home stays warm and comfortable. And because Low-E glass significantly reduces UV light, your furnishings, carpet and drapes are protected from the sun's damaging rays.

Low-E Glass with Argon Gas – Enjoy even more comfort with the addition of insulating argon gas to your Low-E glass windows. Argon is clear, odorless and heavier than air, making it an ideal solution for enhanced insulation and noise buffering.

Ultra Low-E Glass with Argon Gas

For optimal energy efficiency and maximum cost savings, choose our ultimate glass package: Ultra Low-E Glass with Argon Gas. Windows with this glass treatment offer superior thermal performance by combining three layers of silver with the insulating power of argon. This glass option is designed to meet stringent energy code criteria anywhere low thermal numbers are desired.

In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.

In the winter, Low-E glass lets the warm, solar rays in while blocking the heat in the home from getting out.

ENERGY STAR CLIMATE ZONE MAP

CRITERIA FOR WINDOWS

Climate Zone	U-Factor	SHGC
Northern	≤ 0.30	Any
North/Central	≤ 0.31	≥ 0.35
South/Central	≤ 0.32	≥ 0.40
Southern	≤ 0.30	≤ 0.40
Air Leakage Rating	≤ 0.25	

The Energy Star program for windows divides the country into four distinct climate zones to recognize the varying heating and cooling months among the states.

CRITERIA FOR PATIO DOORS

Glazing Level	U-Factor	SHGC
> 1/2 Lite	≤ 0.30	Any
	≤ 0.31	≥ 0.40
	≤ 0.32	≥ 0.40
Air Leakage Rating	≤ 0.3 cfm/ft	

For patio doors, there is only one U-Factor and one Solar Heat Gain Coefficient (SHGC) requirement for Energy Star compliance.

Please consult your home improvement or new construction professional for specific thermal properties that vary based on glass options and grid choices, and verify your window's actual performance to ensure Energy Star rating in your specific climate zone.
